Office Action Summary	Application No. 09/935,619	Applicant(s) BEUERMANN ET AL.	
	Examiner Edward J. Cain	Art Unit 1714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 28-30 and 32-54 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al.

Lee et al disclose polymerization processes for the production of polymeric powder coating materials. These processes comprise the use of supercritical fluids at temperatures up to 190 C and pressures from 72.9 atm to 272 atm. The monomers suitable for polymerization include epoxies, esters, acrylics and mixtures thereof with specific embodiments to copolymers of acrylic monomers. The incorporation of additional adjuvants such as crosslinkers(hardeners), pigments, light stabilizers etc. is taught at column 9, lines 28-35.

Subsequent processing of the reaction mixture, which includes pressure and temperature variation, to separate polymer from monomer and monomer from fluid is taught at column 8, line 21 to column 9, line 15.

Therefore, the reference anticipates the rejected claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al.

Lee et al disclose processes for the production of powder coating materials as discussed above. The reference fails to explicitly recite the use of three or more monomers. It is the position of the examiner that the recitation by the reference of "mixtures thereof" at column 7, line 45, renders obvious applicants claimed combination of three monomers.
